

What's Next Guide

Find out the next steps as you start
your treatment journey

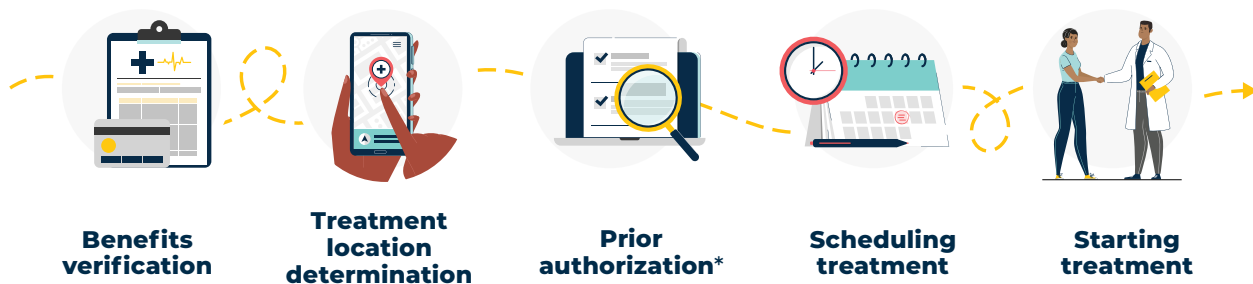

You've just been prescribed VYVGART Hytrulo

Starting a new treatment can bring up lots of questions. This guide outlines what steps are unfolding as you start your VYVGART Hytrulo journey and introduces the My VYVGART Path program.

Through My VYVGART Path, you can get support from a Nurse Case Manager (NCM) who can help guide you through the treatment process and provide access to resources so you can feel prepared for what's next. **Get more information about My VYVGART Path on page 7.**

Steps to receive VYVGART Hytrulo

*Each insurance company's timeline will vary.

Please see Important Safety Information on page 8. Please see full Prescribing and Patient Information for VYVGART HYTRULO.

Navigating the insurance process

Benefits verification

Your insurance is contacted to get proper information about your coverage for VYVGART Hytrulo. During this step, your doctor's office will be preparing all necessary paperwork.

Treatment location determination

Your doctor will work with you and your insurance provider to determine where you will receive your treatment. Possible locations include an infusion center, physician's office, and, in some cases, your home.*

Prior authorization

You may need a prior authorization before you start treatment, depending on your insurance. Prior authorization is a pre-approval your insurance provider may require before you can receive coverage for certain healthcare services or prescriptions.

What if my insurance denies coverage for VYVGART Hytrulo?

You may still be able to receive treatment, but your out-of-pocket costs may be high if you do not obtain insurance coverage. If you're denied coverage for VYVGART Hytrulo, the team at My VYVGART Path may be able to assist your healthcare provider with the appeal process. If the appeal process is exhausted, an NCM from My VYVGART Path may be able to provide information on potential financial assistance programs.

*In some cases, VYVGART Hytrulo may also be given at home by a trained nurse.

Please see Important Safety Information on page 8. Please see full [Prescribing](#) and [Patient Information](#) for VYVGART HYTRULO.

Getting on treatment

Preparing for your VYVGART Hytrulo prefilled syringe delivery

Once you have received your prior authorization, it's time to work with your doctor to schedule your first VYVGART Hytrulo injection. You will be contacted by a specialty pharmacy or your doctor's office.* In this conversation, you'll go over coverage, how you'll get your treatment, and any out-of-pocket costs.

If you are self-injecting with the VYVGART Hytrulo prefilled syringe, the specialty pharmacy will call to schedule at least 2 at-home injection training sessions with a healthcare professional. If you would like more training, additional sessions can be scheduled as needed.

Storing VYVGART Hytrulo prefilled syringe

Once your training is scheduled, VYVGART Hytrulo will be shipped to your home. Upon receiving the medication, VYVGART Hytrulo should be stored properly as soon as possible.

- ➔ **Store VYVGART Hytrulo in the refrigerator** between 36°F to 46°F (2°C to 8°C)
- ➔ **Keep the prefilled syringes in the original carton** to protect them from light
- ➔ **Keep VYVGART Hytrulo and all medicine out of reach of children**

Do not freeze the prefilled syringes or store them in direct sunlight.

Do not use a prefilled syringe that has been frozen or left in direct sunlight.

Please see **Patient Information**. Follow appropriate administration steps and storage and handling guidance in the **Instructions for Use**.

*A specialty pharmacy is a pharmacy that provides medications that require special handling, storage, and delivery.

SELECT IMPORTANT SAFETY INFORMATION

Do not take VYVGART HYTRULO if you are allergic to efgartigimod alfa, hyaluronidase, or any of the ingredients in VYVGART HYTRULO. VYVGART HYTRULO can cause serious allergic reactions and a decrease in blood pressure leading to fainting.

Please see Important Safety Information on page 8. Please see full Prescribing and Patient Information for VYVGART HYTRULO.

Starting treatment for CIDP

If you are self-injecting with the VYVGART Hytrulo prefilled syringe, you and/or your caregiver will receive in-person training at home or in your doctor's office until you're ready to inject on your own. You'll also get a demonstration kit to help you practice.

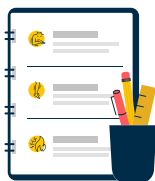

VYVGART Hytrulo prefilled syringe for self-injection:

A ~20-30 second self-injection, delivered under the skin (subcutaneously) once weekly*

*Please see **Patient Information**. Follow appropriate administration steps in the **Instructions for Use**. Monitor for signs and symptoms of an allergic reaction for at least 30 minutes after injection. If an allergic reaction occurs, you should seek medical treatment.

What if I miss a dose of VYVGART Hytrulo?

If you miss an injection, you have a 3-day window to make it up before returning to your dosing schedule.

Recording your symptoms and abilities

It is important to take note of your symptoms and abilities during treatment, so you and your doctor can discuss how CIDP is affecting your daily life.

CIDP=chronic inflammatory demyelinating polyneuropathy

Please see Important Safety Information on page 8. Please see full Prescribing and Patient Information for VYVGART HYTRULO.

Personalized support for every step of your journey

My VYVGART Path is a patient support program that pairs you with a dedicated NCM, who can help you navigate insurance, offer resources, talk through your challenges, and more.

Once enrolled in My VYVGART Path, you will receive a call from an NCM to welcome you into the program. A welcome kit will be mailed to you that includes a treatment journal and other helpful treatment-related resources.

There are 2 options to sign up once your doctor has prescribed you VYVGART Hytrulo:

OPTION 1

Visit enrollMVP.com to complete the My VYVGART Path enrollment form.

OPTION 2

Speak with your doctor and ask to be enrolled in My VYVGART Path.

Information provided by the Nurse Case Managers is not intended or implied to be a substitute for professional medical advice, diagnosis, or treatment. Always consult with a qualified and licensed physician or other healthcare provider regarding your medical condition, treatment, and healthcare needs.

Please see Important Safety Information on page 8. Please see full [Prescribing](#) and [Patient Information](#) for VYVGART HYTRULO.

IMPORTANT SAFETY INFORMATION

Do not take VYVGART HYTRULO if you are allergic to efgartigimod alfa, hyaluronidase, or any of the ingredients in VYVGART HYTRULO. VYVGART HYTRULO can cause serious allergic reactions and a decrease in blood pressure leading to fainting.

Before taking VYVGART HYTRULO, tell your healthcare provider about all of your medical conditions, including if you:

- have an infection or fever.
- have recently received or are scheduled to receive any vaccinations.
- have any history of allergic reactions.
- have kidney (renal) problems.
- are pregnant or plan to become pregnant. It is not known whether VYVGART HYTRULO will harm your unborn baby.
 - Pregnancy Exposure Registry. There is a pregnancy exposure registry for women who use VYVGART HYTRULO during pregnancy. The purpose of this registry is to collect information about your health and your baby. Your healthcare provider can enroll you in this registry. You may also enroll yourself or get more information about the registry by calling 1-855-272-6524 or going to VYVGARTPregnancy.com
- are breastfeeding or plan to breastfeed. It is not known if VYVGART HYTRULO passes into your breast milk.

Tell your healthcare provider about all the medicines you take, including prescription and over-the-counter medicines, vitamins, and herbal supplements.

VYVGART HYTRULO can cause side effects which can be serious, including:

- **Infection.** VYVGART HYTRULO may increase the risk of infection. If you have an active infection, your healthcare provider should delay your treatment with VYVGART HYTRULO until your infection is gone. Tell your healthcare provider right away if you get any of the following signs and symptoms of an infection:
 - fever
 - chills
 - frequent and painful urination
 - cough
 - pain and blockage of nasal passages
 - wheezing
 - shortness of breath
 - sore throat
 - excess phlegm
 - nasal discharge

- **Allergic reactions (hypersensitivity reactions).**

VYVGART HYTRULO can cause allergic reactions that can be severe. These reactions can happen during, shortly after, or weeks after your VYVGART HYTRULO injection. Tell your healthcare provider or get emergency help right away if you have any of the following symptoms of an allergic reaction:

- rash
- swelling of the face, lips, throat, or tongue
- shortness of breath
- hives
- trouble breathing
- low blood pressure
- fainting

- **Infusion or injection-related reactions.**

VYVGART HYTRULO can cause infusion or injection-related reactions. These reactions can happen during or shortly after your VYVGART HYTRULO injection. Tell your healthcare provider if you have any of the following symptoms of an infusion or injection-related reaction:

- high blood pressure
- chills
- shivering
- chest, stomach, or back pain

The most common side effects of VYVGART HYTRULO include respiratory tract infection, headache, urinary tract infection, and injection site reactions.

These are not all the possible side effects of VYVGART HYTRULO. Call your doctor for medical advice about side effects. You may report side effects to FDA at 1-800-FDA-1088.

What is VYVGART HYTRULO® (efgartigimod alfa and hyaluronidase-qvfc)?

VYVGART HYTRULO is a prescription medicine used to treat adults with chronic inflammatory demyelinating polyneuropathy (CIDP).

It is not known if VYVGART HYTRULO is safe and effective in children.

Please see full [Prescribing and Patient Information for VYVGART HYTRULO](#).

Dosage forms and strengths:

VYVGART Hytrulo is available as a single-dose subcutaneous injection containing: 200 mg/mL of efgartigimod alfa and 2,000 U/mL of hyaluronidase per prefilled syringe, or 180 mg/mL of efgartigimod alfa and 2,000 U/mL of hyaluronidase per vial.
